

JACK LEE

Roscommon, Ireland | Email: jack@jack-lee.dev | LinkedIn: [jack-lee12](#) | GitHub: [JackLee504](#)

Computer Science & Information Technology student and Ericsson intern building Python, Jenkins/Groovy, and Spinnaker tooling for cloud-native CI/CD and Kubernetes/Docker workflows, alongside responsive client web development.

EXPERIENCE

Software Engineering Intern | Ericsson, Athlone, Ireland

Jan 2026–Present

- Build Jenkins/Groovy and Spinnaker pipelines for configurable build, test, deployment, cleanup, and cross-pipeline workflows.
- Independently decomposed a 2,000+ line Python CI module into shared and executor-specific components across 14 files, adding parameterisation, unit tests, and lint compliance.
- Added packaging and artifact-repository verification, and resolved CI/CD infrastructure issues across Kubernetes, Docker, Helm/Helmfile, and pipeline integrations.

Web Development Intern | Ossark, Athlone, Ireland

May 2025–Aug 2025

- Built and maintained client websites with PHP and SCSS, turning feedback into responsive, accessible page updates.
- Resolved frontend issues and delivered polished updates across existing client sites, maintaining visual consistency and responsive behaviour.
- Contributed to full-stack website projects, supporting feature delivery from implementation through QA and release.

Cashier & Customer Service Representative | Casey's Londis, Roscommon, Ireland

May 2024–Mar 2026

- Handled checkout, customer queries, and day-to-day store tasks in a busy retail setting, keeping service accurate and calm during peak periods.
- Coordinated with teammates to keep checkout operations efficient during busy periods.

PROJECTS

Deal Ledger | *Hugo, Python, GitHub Actions, Cloudflare Workers, DNS*

- Built a responsive Hugo affiliate deal-discovery site with localised interfaces and market-specific routing across English, German, Dutch, and French.
- Automated Amazon candidate review, listing and price validation, builds, SEO checks, alert emails, domain and DNS configuration, and Cloudflare routing with Python and GitHub Actions.

Multi-Broker Paper Trading Platform | *Python, APIs, SQLite, testing, observability*

- Built a modular Python paper-trading platform for FX, CFDs, and US equities, separating strategy, execution, risk, market data, journaling, and dashboards.
- Integrated IG, Capital.com, and Alpaca paper/demo workflows with SQLite journaling, risk checks, and automated tests.

Unity Racing Game | *Unity, C#, NavMesh AI, JSON and CSV persistence*

- Built race and hot-lap modes with configurable lap counts, checkpoint validation, timing, reset handling, and a CSV-backed top-10 leaderboard.
- Implemented three NavMesh-controlled competitors that follow a 200+ node JSON race path, including corner-speed adjustments and respawn behaviour.

TECHNICAL SKILLS

CI/CD & Cloud-Native: Jenkins, Spinnaker, Docker, Kubernetes, Helm/Helmfile, Maven, Artifactory, Nexus

Delivery & Reliability: Git, Gerrit, Jira, Confluence, Unit Testing, Build Verification, Artifact Repositories, Quality Assurance (QA), Technical Documentation, Agile Delivery

Programming & Scripting: Python, Groovy, Bash, Java, C#, C, PHP, SQL, R

Web Development: Hugo, HTML, JavaScript, CSS, SCSS, WordPress

Engineering Foundations: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Computer Networks

EDUCATION

BSc (Hons) Computer Science & Information Technology

Expected 2027

University of Galway | Target classification: First-Class Honours (1.1) | Selected modules: Programming III (78%), Introduction to Modelling (74%), Discrete Mathematics (72%), Networks & Data Communications (72%), and Database Systems (71%)

Leaving Certificate | Scoil Mhuire, Strokestown, Co. Roscommon | 520 points (2023)
