

JACK LEE

Roscommon, Ireland | jack@jack-lee.dev | [linkedin.com/in/jack-lee12](https://www.linkedin.com/in/jack-lee12) | github.com/JackLee504

Software engineering student and Ericsson intern with hands-on experience in Python CI tooling, Jenkins and Spinnaker pipelines, cloud-native delivery workflows, and responsive client web development.

EXPERIENCE

Software Engineer Intern | Ericsson, Athlone, Ireland

Jan 2026–Present

- Moved from a broader support role into a central CI/CD pipeline team supporting build, test, and deployment workflows for cloud-native services.
- Independently decomposed a 2,000+ line Python CI component into shared and executor-specific modules across 14 modules, adding parameterisation, unit tests, and lint compliance.
- Develop and maintain Jenkins/Groovy and Spinnaker pipeline changes for configurable build and packaging workflows, including verification stages and test-flow improvements.
- Investigate build and infrastructure issues across Kubernetes, Docker, and pipeline integrations, collaborating through Gerrit review, Jira, and technical documentation.

Web Developer Intern | Ossark, Athlone, Ireland

May 2025–Aug 2025

- Built and refined responsive client websites using PHP and SCSS, with attention to usability and accessibility across devices.
- Contributed to full-stack projects with the team, helping deliver robust applications and client-facing web features.
- Resolved defects and optimized site performance to support smooth, reliable user experiences.

Cashier & Customer Service Representative | Casey's Londis, Roscommon, Ireland

May 2024–Mar 2026

- Handle high-volume transactions accurately and resolve customer issues promptly, demonstrating attention to detail and clear communication.
- Prioritize tasks and coordinate with teammates to maintain efficient checkout flow in a fast-paced setting.

PROJECTS

INDEPENDENT PROJECTS

Deal Ledger | *Hugo, Python, GitHub Actions, Cloudflare Workers, DNS*

- Built a responsive Hugo affiliate deal-discovery site with localised interfaces and market-specific routing across English, German, Dutch, and French.
- Automated Amazon candidate review, listing and price validation, builds, SEO checks, alert emails, domain/DNS configuration, and Cloudflare routing with Python and GitHub Actions.

Multi-Broker Paper Trading Platform | *Python, APIs, SQLite, testing, observability*

- Built a modular Python paper-trading platform for FX, CFDs, and US equities, separating strategy, execution, risk, market data, journaling, and dashboards.
- Integrated IG, Capital.com, and Alpaca paper/demo workflows with SQLite journaling, risk checks, and automated tests.

UNIVERSITY COURSEWORK PROJECTS

Car Racing Application | *Gameplay logic, leaderboards, performance*

- Developed a racing application where users compete against bots or race for fastest-lap leaderboard rankings.
- Designed core gameplay and lap-time ranking mechanics with responsive interaction and reliable score handling.

Data Structures & Algorithmic Games | *Algorithms, persistence, game logic*

- Built a savable Binary Tree item-guessing game, Alien Invaders, and a persistence-backed A* pathfinding game.
- Applied data structures, algorithms, and AI/pathfinding patterns in interactive game systems.

EDUCATION

BSc (Hons) Computer Science & Information Technology

Expected 2027

University of Galway | Expected First-Class Honours (1.1) | Relevant coursework: Database Systems, Algorithms & Data Structures, Software Engineering, Networks & Data Communications

Scoil Mhuire, Strokestown, Co. Roscommon | Leaving Certificate: 520 points (2023)

TECHNICAL SKILLS

CI/CD & Cloud-Native: Jenkins, Spinnaker, Docker, Kubernetes, Helm/Helmfile, Maven, Artifactory, Nexus

Languages & Scripting: Python, Groovy, Bash, Java, C, SQL, JavaScript, PHP, HTML/CSS/SCSS, R

Testing & Data: unit testing, pylint, pytest, pytest-cov, Bandit, pandas, NumPy

Practices: CI/CD, code review, incident investigation, root-cause analysis, Agile delivery, responsive web development
